

NAFFCOOL # 310Stp

Stamping Parts Operations

Naffcool #310Stp is a viscosity mineral based oil, specially formulated for light machining operation. It offers an excellent finishing and lubricity. This product does not contain any sulphur, chlorine, heavy metal, etc.

TYPICAL CHARACTERISTIC

Colour	: Amber
Specific Gravity at 15°C	: 0.878
Viscosity at 40 °C,cSt	: 32
Flash Point COC,°C	: > 230

APPLICATION :

Naffcool #310Stp is commonly used in stamping operation and cutting oil thin metal sheet and small component for electronic industries.
