

PRODUCT INFORMATION

NAFFCOOL # 207 FP

Fast Penetration Cutting Fluids

DESCRIPTIONS

NAFFCOOL # 207 FP is fast penetration cutting fluids, low viscosity, and manufactured from selected base oil for honing of ferrous metals and general machining operations for aluminium, copper or yellow metals.

ADVANTAGES

- Low viscosity and good penetration
- Excellent cooling and lubrication
- Excellent tool life
- Reduce mist formation

TYPICAL PROPERTIES

Specific Gravity at 15°C	0,825
Appearance of Oil	Light Yellow, Liquid
Viscosity at 40°C, cSt ASTM D445	4,5
Copper Strip, 100°C, 3 hours.ASTM D130	1
Sulphur Content, % mass	0,15
Chlorine Content	None
4 Ball Wear Test, mm, ASTM D4172	0,97
