

PRODUCT INFORMATION

NAFFCOOL # 233 AR

Medium Term Rust Preventive Oils

NAFFCOOL # 233 AR is a hydrocarbon solvent deposited water displacing light oily / grease film rust protection. This product gives medium term protection of ferrous and aluminium alloy components during storage and transit and particularly suitable for protection of highly machined precision parts where heavy films are not desirable.

PROTECTION :

- Indoors : 6 months
- Covered Outdoors : 3 months

TYPICAL CHARACTERISTIC :

- Appearance : Light Brown
- Specific Gravity @ 15°C : 0,790
- Flash Point, °C : 38
- Covering Capacity (Dipping) : 67 m³/litre
- Non-volatile Content % : 18

APPLICATION

NAFFCOOL # 233 AR best applied by dipping or spraying (air-assisted or airless). To aid easy of application it is recommended that the product is applied between 20 - 30°C. Ensure that sufficient material is applied to achieve complete coverage and recommended film thickness.

STORAGE

Store in clean and dry conditions away from other combustible materials, heat and direct sunlight. Protect from frost.
