

PRODUCT INFORMATION

NAFFCOOL # 2332 AR **Rust Protection Fluids**

NAFFCOOL # 2332 AR is rust protection, low viscosity compounded petroleum based, specially designed to provide protection metal surface from rust and corrosion.

Application Process

NAFFCOOL # 2332 AR is easy apply by spraying, dipping and brushing. It is designed for use on all metal surface including or other finished part that may corrode – 3 month protection.

Benefits

- Displace water on metal surface
- Highly effective rust protection
- Long effective coating life
- Fast penetration & easy applied
- Safe to use – mild odor

Physical Characteristic

Specific Gravity at 15°C	: 0,77
Flash Point, °C	: 48 min.
Solubility in water	: None
Viscosity @ 25°C, cSt	: 1,20
Appearance – Light Brown Liquid
