

## NAFFCOOL-PROTECLEAN # 09

### Rust Protection & Cleaning Fluids

This product is formulated with a complex chemicals combination of highly polymer based, rust inhibitor additives, and biodegradable surfactant for cleaning and rust protection of metals. It provides a clean, safe and pleasant working environment and operator acceptance.

### Key Performance Benefits using This Product

- Excellent Rust Protection
- Easy to mix with water
- Excellent hard water stability
- High resistance to microbial and fungus
- Effective cleaning to work piece and machine.

### PHYSICAL PROPERTIES

- |                                 |                     |
|---------------------------------|---------------------|
| • Appearance of concentrate     | Clear yellow Liquid |
| • Appearance of dilute solution | Clear               |
| • pH of 10% solution            | 9,00                |
| • Specific Gravity at 25°C      | 1,08                |
| • Foaming tendency              | negligible          |

### RECOMMENDED APPLICATIONS

When a water soluble cleaning-rust preventives is needed for spray, roll on, drip or re-circulating application, dilute with water starting concentration between are 10% - 20% depending on the machined material and operations.
