

NAFFCOOL #198OCL

DESCRIPTION

Naffcool #198OCL is a high-performance oven chain lubricant. This product is designed for high-temperature operations such as lubricity, boundary film, and wetting properties. It contains a synthetic-based lubricant, extreme pressure additives, and high-temperature dispersant.

APPLICATION

This product can be applied for high-temperature chain lubricant, particularly with temperature range from 300°C up to 450°C.

SPECIFICATION

PHYSICAL CHARACTERISTICS

Appearance	Light yellow liquid
Viscosity at 40°C, cSt	160.8
Viscosity at 100°C, cSt	18.1
Viscosity Index	147
Flash Point COC, °C	350
Fire Point, °C	420

BENEFITS

- Excellent wetting properties for high temperature
- Eliminated problems of carbon build-up
- Excellent film-forming properties
- Environmentally friendly and operators acceptance
