

NAFFCOOL #215NC

DESCRIPTION

Naffcool #215NC is a low-viscosity cutting fluid especially recommended and designed for superior cutting and cooling of the work surfaces and cutting tools. This product does not stain copper, aluminum, and their alloys. It contains extreme pressure and anti-mist additives.

APPLICATION

This product is designed as broaching oil, deep hole drilling oil, and for other cutting operations on an extremely difficult-to-machine material.

SPECIFICATION

PHYSICAL CHARACTERISTICS

Viscosity at 40°C, cSt	17
Flash Point COC, °C	230
Specific Gravity	0.86
Colour	Light yellow
% of active sulfur and chlorine	None

BENEFITS

- Good cooling and lubrication
- Excellent corrosion protection
- Enhanced tool life
- Outstanding anti-mist properties
- Free of chlorine and active sulfur
- Contains extreme pressure additives
