

## PRODUCT INFORMATION

### NAFFCOOL # 036 RO

#### Water Miscible Aluminium Rolling Oil

NAFFCOOL # 036 RO is water miscible metalforming oil especially for aluminium hot rolling operations. It is formulated with a complex chemical combination of highly selected base oil, extreme pressure additives, biodegradable emulsifier, rust inhibitors, etc.

#### ADVANTAGES

- Excellent Lubricity
- Excellent Wetting Properties
- Strong Boundary Lubrication
- Easy Application
- Excellent Rust Inhibition

#### PHYSICAL CHARACTERISTICS

Appearance of concentrate	: Light Brown Liq.
Appearance of diluted solution	: Stable Emulsion
Flash point, °C	: 230
Specific gravity at 25°C	: 0,89
Hard water stability	: Excellent

#### APPLICATION

When a water soluble compound is needed for spray, roll on, drip or re-circulating application, diluted with water at 5 to 10 parts of water to 1 part of Naffcool # 036 RO. Add the lubricant to water portion while mixing to make stable emulsion.
