

PRODUCT INFORMATION

NAFFCOOL # 459 CR

**Metalforming Oil for Aluminium Rolling
Process**

DESCRIPTIONS

NAFFCOOL # 459 is metalforming lubricant for cold rolling aluminium operations. This product manufactured from highly refined distillate, low aromatic and low sulphur with various additives provide EP & high strength boundary film lubrication.

ADVANTAGES

- Excellent cooling & lubrications.
- Non staining & fast drying on work piece
- Improve surface finished.
- Low evaporation loss & non irritant.
- Does not contain any sulfur & chlorine EP additives.

TYPICAL CHARACTERISTICS

Appearance of concentrate	Clear Liquid
Viscosity at 40°C	2,50
Specific Gravity at 30°C	0,817
Flash Point, °C	110
Aromatic content, %	5,0
Aniline Point, °C	85

APPLICATION

This product are designed as cold rolling aluminium process can be sprayed onto the work piece.
