

## **NAFFCOOL # 60 Stp**

### ***Stamping Parts Operations***

**Naffcool #06Stp** is a very low viscosity solvent based fluids specially formulated for light machining operation. It offers an excellent finishing and lubricity. The finished products would have almost no film of oil in order to undergo further operation such as plating and phosphating.

### **TYPICAL CHARACTERISTIC**

Colour	Clear
Viscosity at 25 °C,cSt	1.3
Flash Point COC,°C	45

### **APPLICATION :**

**Naffcool #06Stp** is commonly used in stamping operation and cutting oil thin metal sheet and small component for electronic industries.
