

## PRODUCT DATA SHEET

### **NAFFCOOL # EP-1**

#### **Extreme Pressure Additives**

High performance extreme pressure additives for metalforming lubricant especially for drawing, stamping, cold forging and others metalforming application.

#### **TYPICAL PROPERTIES**

- |  |      |
|--|------|
| • Density at 20°C (g/cm <sup>3</sup> ) | 0,90 |
| • Flash point, COC, °C                 | 280  |
| • Pour point, °C                       | -10  |
| • Viscosity Index                      | 160  |
| • Acid Value (mg KOH/g)                | 0,1  |

#### **BENEFITS**

- High Performance Boundary Lubrication
- Reduce metal to metal contact
- Longer service life
- Reduced top up required in operation

#### **APPLICATIONS & RECOMMENDED USAGE**

- |                           |       |
|---------------------------|-------|
| 1. Metal cutting Oil      | 5-10% |
| 2. Drawing & Stamping Oil | 5-15% |
| 3. Metal Rolling Oil      | 5-10% |
