

PRODUCT INFORMATION

NAFFCOOL - SPIN P/C # 1

Spinning Lubricant Process of PP-CF Yarn

NAFFCOOL-SPIN P/C # 1 is spinning lubricant from selected of polyglycolic based with anti-static additives. This product is a spin finish suitable for vertical and horizontal spinning process of PP-CF yarn of medium and high tenacity, very good fiber cohesion, and excellent anti-static properties and runs well in after treatment processes.

KEY PERFORMANCE BENEFITS

- Excellent lubrication.
- Protected against the attack of bacteria and mold for storing.
- Good anti-static properties.
- Good corrosion protection of equipment.
- Environment friendly.

PHYSICAL PROPERTIES

Appearance of concentrate	Clear yellow liquid
Density at 20°C, Kg/L	1,08
pH (10% dilution with water)	7,04
Solubility with water	Excellent, Clear solution
Active content	approx. 85%

APPLICATION

NAFFCOOL-SPIN P/C # 1 is applied to the yarn as a water solution starting from 10% up to 20% by means of the usual application devices.
